

September 21, 2022

According to Section 14 of the *CA Act*, members of an Authority shall be appointed by the respective councils based on that municipality's population within the watershed as outlined in Section 2(2). The population within the watershed is calculated based upon the percent of municipal land area within the Kettle Creek watershed, times the municipality's current total population. Municipal Councils may appoint representatives in the following numbers:

CA Act Sec 2(2)

1. Where the population is 1,000,000 or more, seven representatives.
- 1.1 Where the population is 500,000 or more but less than 1,000,000, six representatives.
- 1.2 Where the population is 250,000 or more but less than 500,000, five representatives.
2. Where the population is 100,000 or more but less than 250,000, four representatives.
3. Where the population is 50,000 or more but less than 100,000, three representatives.
4. Where the population is 10,000 or more but less than 50,000, two representatives.
5. Where the population is less than 10,000, one representative

In 2021, KCCA was concerned that the current population data provided by MPAC necessitated a change in membership for the City of London from 3 member appointments to 2.

This matter was considered again at the September 21, 2022 Full Authority meeting and the following motion was passed:

That the most current population data from Statistics Canada be used to determine membership on the Board of Directors; and further

That KCCA membership be evaluated before each municipal election and member municipalities advised of any necessary changes prior to board appointments.

Consequently, the membership composition for the 2023-2026 term is as follows:

Municipality	Population in Watershed (Stats Canada)	Member Appointment
Central Elgin	8,247	1
Malahide	744	1
Southwold	3,788	1
St. Thomas	41,126	2
London	63,348	3
Middlesex Centre	1,324	1
Thames Centre	1,118	1
